

Part 579.24 Reporting requirements for manufacturers of 500 or more trailers annually.

States in part: For paragraphs (a) and (c) of this section, the manufacturer shall submit information with respect to each make, model and model year of trailer manufactured during the reporting period and the nine model years prior to the earliest model year in the reporting period, including models no longer in production.

(a) Refers to production information and (c) to property damage claims, consumer complaints, warranty claims, and field reports.

Part P. One-time reporting of historical information, also references (a), and (c) of part 579.24.

Doesn't this describe a rolling-type (9 year span) report where we drop the last quarter of the previous report and pick up the current quarter of the next report?

If you are requesting a one-time historical report what is the reason for all the redundancy?
